Experience

Senior Software Engineer

Marriott Hotels | 9/24 - Present

I serve as a technical and architectural subject matter expert for all Experience Cloud products. Such as: AEP, RTCDP, Launch, Analytics, and Target. Integrating apps to natively read and write to RTCDP profiles for personalization purposes, building a documentation site from scratch to visualize our data layer variables to XDM schemas. upgrading various digital properties to the AEP SDKs, rearchitecting marketing channel processing rules to better represent conversion channel data on executive dashboards, etc. I not only do the technical implementation of these projects, but I drive them from a business perspective as well. I also do trainings and presentations for technical and non-technical people audiences, build proof of concepts, and write documentation.

Senior Software Engineer

Rocket Money | 8/23 - 8/24

As a Senior Software Engineer, my primary focus was integrating our website and mobile app with analytics vendors and services such as Adobe, Amplitude, Segment, Google, and Singular. This role required expertise in our codebases and technology stack (React Native & GraphQL). In addition to instrumenting data collection with these tools, I collaborated closely with our Product and Marketing teams to develop website and app experimentation. Furthermore, I served as an advisor on our data governance committee, to help ensure data quality and standardization.

Senior Analytics Engineer

Rocket Mortgage | 8/16 - 8/23

I served as the subject matter expert for Adobe Experience Cloud products. In addition to my technical implementation responsibilities, I also worked as an end-to-end project consultant for the deployment of Adobe Launch, Adobe Analytics, Adobe Target, and the Adobe Experience Platform from both a technical and strategic perspective. This includes writing technical documentation for developers, conducting introductory training for product owners, and building dashboards for analysts.

User Experience Researcher

Quicken Loans | 5/13 - 9/16

I provided insights on the relationship between the behavior of our users, our website data, and the business key performance indicators of Quicken Loans' various web and mobile applications.

Projects

Deploying Target at Large Organizations Podcast

In this Podcast, I am interviewed about tips and tricks for deploying Target at large organizations.

https://perpetua.digital/podcast

Perpetua Digital Launch Assistant

I am the sole developer of the Perpetua Digital Launch Assistant. The Perpetua Digital Launch Assistant is a tool for Adobe Developers that offers better Searching, Visualization of Data Elements and Rule relationships, and creating email and slack alerts for Launch properties.
